PROFILE

Ambitious and driven: two words that define me. I am a student with a strong interest in mathematics, economics and financial markets, and their influence on the wider world. I love challenging myself, learning independently and exploring new ideas, especially where business, technology and finance intersect. I value initiative, continuous improvement and taking responsibility for my own development. My long-term ambition is to pursue a career in investment banking, and I am eager to deepen my understanding of the industry while developing the knowledge and skills needed to succeed in a challenging professional environment.
